Uruguay

shaping the World

“Uruguay has a long tradition in architecture and engineering services. The streets of Montevideo (its capital city), Punta del Este (its main beach resort) and other important cities, are faithful witnesses of the variety of styles, design and project execution quality.

In Uruguay you may find consulting firms, skilled and multilingual (Spanish, English, French, Portuguese) professional teams, with solid background, committed and adaptable talent, with an excellent cost - benefit relationship.

The large number of architects and engineers worldwide renowned (i.e., Engineers such as Eladio Dieste, Rafael Guarga or Juan Grompone and Architects such as Mariano Arana, Carlos Ott, Rafael Viñoly, Héctor Vigliecca or Carlos Arcos, among others) are the proof of the quality and reliability of the professional pool and their innovation capacities.”

Arch. Eneida de León

President of the Uruguayan Society of Architects

“Architects graduated from our University acquire a general and balanced formation in Architecture which allows them to practice the profession in its whole concept, covering all of its scales, including urban - territorial, having the ability to develop project, management and programming services.”

Dr. Arch. Gustavo Scheps

Dean, University of the Republic - Architecture School
